TABLE DF – 3: CREDIT RISK: GENERAL DISCLOSURES

(i) Qualitative Disclosures:

• **Definitions of past due and impaired (for accounting purposes);**

Definition and classification of Non-Performing Assets (NPAs):

The Bank classifies its advances (loans and credit substitutes in the nature of an advance) into performing and non-performing loans in accordance with the extant RBI guidelines. A non performing asset (NPA) is a loan or an advance where.

1. Interest and/ or installment of principal remain overdue for a period of more than 90 days in respect of a term loan.
2. The account remains 'out of order', in respect of an Overdraft/Cash Credit (OD/CC). An account should be treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power for 90 days. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period.
3. The bill remains overdue for a period of more than 90 days in the case of bills purchased and discounted.
4. The installment of principal or interest thereon remains overdue for two crop seasons for short duration crops, and for one crop season for long duration crops.
5. The amount of liquidity facility remains outstanding for more than 90 days, in respect of a securitisation transaction undertaken in terms of guidelines on securitisation dated February 1, 2006.
6. In respect of derivative transactions, the overdue receivables representing positive mark-to-market value of a derivative contract, if these remain unpaid for a period of 90 days from the specified due date for payment.

Any amount due to the Bank under any credit facility is 'overdue' if it is not paid on the due date fixed by the Bank. Asset classification has been made borrower-wise and not facility-wise. In other words, when a particular facility of a borrower has become non-performing, all the facilities granted by the Bank to that borrower will be classified as NPA.

Irrespective of record of recovery, the Bank identifies a borrower account as a NPA even if it does not meet any of the above mentioned criteria, where:

- a. Loans availed by a borrower are repeatedly restructured unless otherwise permitted by regulations;
- b. Loans availed by a borrower are classified as fraud;

c. Project does not commence commercial operations within the timelines permitted under the RBI guidelines in respect of the loans extended to a borrower for the purpose of implementing a project; and

d. Any security in nature of debenture/bonds/equity shares issued by a borrower and held by the Bank is classified as non-performing investment.

For loans held at the overseas branches, identification of NPAs is based on the home country regulations (RBI guidelines) or the host country regulations (overseas branch regulator's guidelines), whichever is more stringent.

Further, NPAs are classified into sub-standard, doubtful and loss assets based on the criteria stipulated by RBI. A sub-standard asset is one, which has remained a NPA for a period less than or equal to twelve months. An asset is classified as doubtful if it has remained in the sub-standard category for more than 12 months. A loss asset is one where loss has been identified by the Bank or internal or external auditors or during RBI inspection but the amount has not been written off fully.

- **Discussion of the bank's credit risk management policy;**

Bank has put in place Board approved Credit Risk Management Policy (CRM Policy), which governs all credit risk related aspects. CRM Policy outlines the principles, standards and approach for credit risk management at the Bank. It establishes systems, procedures, controls and measures to actively manage the credit risks, optimize resources and protect the bank against adverse credit situations. The delegation of power for approval of credit limits is approved by the Board of Directors.

The Bank's policies assume moderate risk appetite and healthy balance between risk and return. The primary risk management goals are to maximize value for shareholders within acceptable parameters and adequately addressing the requirements of regulatory authorities, depositors and other stakeholders. The guiding principles in risk management of the Bank comprise of Compliance with regulatory and legal requirements, achieving a balance between risk and return, ensuring independence of risk functions, and aligning risk management and business objectives. The Credit Risk Management process of the Bank is driven by a strong organizational culture and sound operating procedures, involving corporate values, attitudes, competencies, employment of business intelligence tools, internal control culture, effective internal reporting and contingency planning.

The overall objectives of Bank's Credit Risk Management are to:

- Ensure credit growth, both qualitatively and quantitatively that would be sectorally balanced, diversified with optimum dispersal of risk.
- Ensure adherence to regulatory prudential norms on exposures and portfolios.
- Adequately pricing various risks in the credit exposure.
- Form part of an integrated system of risk management encompassing identification, measurement, monitoring and control.

▪ **Strategies and processes:**

In order to realize the above objectives of Credit Risk Management, the Bank prescribes various methods for Credit Risk identification, measurement, grading and aggregation techniques, monitoring and reporting, risk control/ mitigation techniques and management of problem loans/ credits. The Bank has also defined target markets, risk acceptance criteria, credit approval authorities, and guidelines on credit origination/ maintenance procedures.

The strategies are framed keeping in view various measures for Credit Risk Mitigation, which includes identification of thrust areas and target markets, fixing of exposure ceiling based on regulatory guidelines and risk appetite of the Bank, Minimizing Concentration Risk, and pricing based on rating.

Bank from time to time would identify the potential and productive sectors for lending, based on the performance of the segments and demands of the economy. The Bank restricts its exposures in sectors which do not have growth potentials, based on the Bank's evaluation of industries/ sectors based on the prevailing economic scenario prospects, etc.

The operational processes and systems of the Bank relating to credit are framed on sound Credit Risk Management Principles and are subjected to periodical review.

The Bank has comprehensive credit risk identification processes as part of due diligence on credit proposals.

▪ **The structure and organization of the Credit Risk Management Function:** Credit Risk Management Structure in the Bank is as under-

- i. Board of Directors
- ii. Risk Management Committee of the Board (RMCB)
- iii. Credit Risk Management Committee (CRMC)
- iv. Model Review Technical Working Group (MRTWG)
- v. General Manager-Risk Management Wing, H.O (Chief Risk Officer)
- vi. Deputy General Manager (I&II), Risk Management Wing
- vii. Credit Risk Management Department, Risk Management Wing
- viii. The Credit Risk Management Department comprises of Credit Policy Section, Credit Statistics Section and Credit Risk Management Section. The Credit Risk Management Section has three functional desks, the Credit Risk Management Desk, Credit Risk Rating Desk and Industry Research Desk.
- ix. Model Development Team
- x. Model Validation Team (MVT)
- xi. Risk Management & Credit Review Section at Circle Offices.

▪ **The scope and nature of risk reporting and / or measurement systems:**

Bank has an appropriate credit risk measurement and monitoring processes. The measurement of risk is through a pre-sanction exercise of credit risk rating and scoring models put in place by the Bank. The Bank has a separate Risk Rating Policy for identifying the parameters under each of these risks as also assigning weighted scores thereto and rating them on a scale of I to VII. Grade VIII or High Risk Grade III is termed as default grade. The risk rating policy also entails the guidelines on usage/mapping of ratings assigned by the recognized ECAs (External Credit Assessment Institutions) for assigning risk weights for the eligible credit exposures as per the guidelines of the RBI on standardized approach for capital computation and also for pricing purposes.

The Bank has adopted 'Standardized Approach' for entire credit portfolio for credit risk measurement. The bank is endeavouring to move towards IRB approaches and made all necessary efforts in this regard.

The Bank has embarked upon implementation of a software solution to get system support for establishing a robust credit data warehouse for all MIS requirements, computation of Risk Weighted Assets (RWA), generate various credit related reports for review of exposure and monitoring, and conducting analysis of credit portfolio from various angles.

▪ **Policies for hedging and / or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges / mitigants:**

Bank primarily relies on the borrower's financial strength and debt servicing capacity while approving credits. Bank does not excessively rely on collaterals or guarantees as a source of repayment or as a substitute for evaluating borrower's creditworthiness. The Bank does not deny credit facilities to those assessed as credit worthy for mere want of adequate collaterals.

In order to manage the Bank's credit risk exposure, the Bank has adopted credit appraisal and approval policies and procedures that are reviewed and updated by the Risk Management Wing at Head office in consultation with other functional wings. The credit appraisal and approval process is broadly divided into credit origination, appraisal, assessment and approval, and dispensation.

Corporate finance and project finance loans are typically secured by a first lien on fixed assets, normally consisting of property, plant and equipment. The Bank also takes security of pledge of financial assets like marketable securities and obtains corporate guarantees and personal guarantees wherever appropriate. Working Capital loans are typically secured by a first lien on current assets, which normally consist of inventory and receivables.

Bank has laid down detailed guidelines on documentation to ensure legal certainty of Bank's charge on collaterals.

The Bank's policy is to ensure portfolio diversification and evaluate overall exposure in a particular industry / sector in the light of forecasts of growth and profitability for that industry, and the risk appetite of the Bank. The Bank monitors exposures to major sectors of the economy and specifically exposure to various industries and sensitive sectors. Exposure to industrial activities is

subjected to the credit exposure ceilings fixed by the Bank based on the analysis on performance of the industry. The Bank's exposures to single and group borrowers as also substantial exposure is fixed as per the risk rating of the borrowers and monitored periodically in order to keep the exposure level within the prudential ceiling norms advised by Reserve Bank of India from time to time.

The credit origination is through the grass root level ably assisted by the branch net work and Circle Offices. The process of identification, application is carried out before commencing an in depth appraisal, due diligence and assessment.

The credit approval process is a critical factor and commences with the mandatory credit risk rating of the borrower as a pre sanction exercise. The measurement of Credit Risk associated with the borrower evaluates indicative factors like; borrowers' financial position, cash flows, activity, current market trends, past trends, management capabilities, experience with associated business entities, nature of facilities etc. The credit sanctioning powers delegated to the various authorities based on internal risk rating categories of the borrower already put in place. In terms of the Ministry of Finance notifications, Bank has set up Credit Approval Committees at HO and circle levels. The credit sanctioning powers of all the sanctioning authorities at administrative units (i.e., besides branch powers) are withdrawn and the committee approach for credit approval has been put in place. The Bank has in place specialized branches viz. Centralized Processing Units (CPUs), Retail Asset Hubs (RAHs) and SME Sulabhs at select cities to ease credit dispensation turnaround time and ensure specialized attention.

To enhance the control measures, a separate Credit Administration and Monitoring Wing is in place to undertake exclusive loan review, monitoring problem accounts, credit audit, etc. This ensures greater thrust on post sanction monitoring of loans and strengthen administering the various tools available under the Banks' policies on loan review mechanism.

For effective loan review, the Bank has the following in place:

- Pre-release Audit System for compliance to sanction terms and conditions, obtention of stipulated collateral securities ensuring perfection of securities before disbursement etc.
- Credit Audit System to identify, analyze instances of non-compliance and rectification for all types of credit facilities sanctioned with credit limit of Rs. 5 crore.
- Review of loan sanctioned by each sanctioning authority by the next higher authority.
- Mid Term Review of borrowal accounts beyond a certain level of exposure.
- Monitoring of Special Mention Accounts (SMA) at various levels. Formation of a Joint Lenders' Forum (JLF) and formulation of Corrective Action Plan (CAP) in the case of consortium/JLA accounts, for early rectification or restructuring.
- Monitoring tools like Credit Monitoring Format (web-based), Quarterly Information Systems, Half Yearly Operation Systems, Stock Audits etc.
- Credit Monitoring Officers at branches.

- A framework has been developed outlining a corrective action plan that will incentivize early identification of problem account, timely restructuring of accounts which are considered to be viable and taking prompt steps by lenders for recovery or sale thereby revitalizing the distressed accounts in the Bank.
- **Loans Past due and Impaired:** As per the prudential norms applied for income recognition, asset classification and provisioning, the Bank considers including following categories of loans and advances as Non-performing Assets, wherein:
 - Interest and/or instalment of principal remain overdue for a period of more than 90 days in respect of a Term Loan.
 - The account remains 'out of order' in respect of an Overdraft/Cash Credit (OD/CC). An account should be treated as 'out of order' if the outstanding balance remains continuously in excess of the sanctioned limit/drawing power. In cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power, but there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period, these accounts should be treated as 'out of order'.
 - The bill remains overdue for a period of more than 90 days in the case of Bills Purchased and Discounted.
 - In case of agricultural advances, interest and/or instalment of principal remains overdue for 2 crop seasons (in respect of short duration crops) & 1 crop season (in respect of long duration crops).
 - Any amount receivable that remains overdue for a period of more than 90 days in respect of other accounts.
 - Interest charged during any quarter is not serviced fully within 90 days from the end of the quarter and /or
 - As specified by the regulator from time to time.

TABLE DF – 4: CREDIT RISK: DISCLOSURES FOR PORTFOLIOS SUBJECT TO THE STANDARDIZED APPROACH

(i) Qualitative Disclosures:

The Bank has recognized following credit rating agencies for the purpose of rating of an exposure & assigning risk weights for computation of capital charge under standardized approach.

Domestic credit rating agencies:

- Brickwork Ratings India Private Limited (Brickwork),
- Credit Analysis & Research Limited (CARE),
- CRISIL Limited,
- ICRA Limited,
- India Ratings and Research Private Limited (Formerly FITCH India)
- SMERA Ratings Limited

International Credit Rating Agencies:

- Standard & Poor,
- Moody's ,
- FITCH.

Types of exposure for which each agency is used:

All the above agencies are recognized for rating all types of exposures.

A description of the process used to transfer public issue ratings onto comparable assets in the banking books:

- The Bank uses only publicly available solicited ratings that are valid and reviewed by the recognized External Credit Rating Agencies, referred as External Credit Assessment Institutions (ECAI).
- Bank uses Bank Loan Rating for risk weighting the borrower's exposures. Where Issuer Rating is available, the Bank uses such ratings unless the bank loan is specifically rated.
- The Bank does not simultaneously use the rating of one ECAI for one exposure and that of another ECAI for another exposure of the same borrower, unless the respective exposures are rated by only one of the chosen ECAs. Further, the Bank does not use rating assigned to a particular entity within a corporate group to risk weight other entities within the same group.
- Running limits such as Cash Credit are treated as long term exposures and accordingly, long term ratings are used for assigning risk weights for such exposures.

- While mapping/applying the ratings assigned by the ECAs, the Bank is guided by regulatory guidelines/Bank's Board approved Policy.
- Where exposures/ borrowers have multiple ratings from the chosen ECAs, the Bank has adopted the following procedure for risk weight calculations:
 - If there are two ratings accorded by chosen ECAs, which map into different risk weights, the higher risk weight is applied.
 - If there are three or more ratings accorded by the chosen ECAs which map into different risk weights, the ratings corresponding to the lowest 2 ratings are referred to and higher of those two risk weights is applied.

TABLE DF – 5: CREDIT RISK MITIGATION – DISCLOSURES FOR STANDARDIZED APPROACHES

(i) Qualitative Disclosures:

Policies and processes for collateral valuation and management: The Bank is having a Board approved collateral management policy which lays down the process, objectives, accepted types of collaterals and the framework including suitable management information system for effective collateral management. The Collaterals and guarantees properly taken and managed that would serve to:

- mitigate the risk by providing secondary source of repayment in the event of borrower's default on a credit facility due to inadequacy in expected cash flow or not;
- gain control on the source of repayment in the event of default;
- provide early warning of a borrower's deteriorating repayment ability; and
- Optimize risk weighted assets and to address Residual Risks adequately.

Bank uses a number of techniques to mitigate the credit risks to which they are exposed. The revised approach allows banks in India to adopt the Comprehensive Approach (under both the Standardized and IRB approaches) which allows fuller offset of collateral against exposures by effectively reducing the exposure amount by the value ascribed to the collateral. Under this approach, banks, which take eligible financial collateral, are allowed to reduce their credit exposure to the counterparty when calculating their capital requirements by taking into account the risk mitigating effect of the collateral.

Collateral Management process and practices of the Bank cover the entire activities comprising security and protection of collateral value, validity of collaterals and guarantees, and valuation / periodical inspection.

Valuation: Both the Fixed and the Current Assets obtained to secure the loans granted by the Bank are subjected to valuation by valuers empanelled by the Bank. Monetary limits of the accounts, asset classification of the borrower, which is to be subjected to valuation, periodicity of valuation, are prescribed in the Bank's policy guidelines. Bank reviews the guidelines on valuation periodically.

Description of the main types of collateral taken by the Bank: The collateral commonly used by the Bank as risk mitigants comprises of Financial Collaterals (i.e. Cash, Bank deposits, Life Insurance policies, NSC, KVP, Government securities issued directly / by postal departments, equity shares of limited companies other than the Bank and approved by the Bank, debentures, units of mutual funds, debt securities etc.), different categories of moveable assets and immovable assets / properties etc. However, for the purpose of computation of capital required under Standardized Approach, certain specific financial collaterals have been recognized as eligible collateral.

Main types of Guarantor counterparty and their creditworthiness: Bank obtains/ accepts guarantees of sovereign, sovereign entities (including BIS, IMF, European Central Bank and European community as well as Multilateral Development Banks, ECGC and CGTMSE). Besides this, Bank also obtains Personal or Corporate guarantee having adequate net worth, as an additional comfort for mitigation of credit risk which can be translated into a direct claim on the guarantor, and are unconditional and irrevocable. The Creditworthiness of the guarantor is normally not linked to or affected by the borrower's financial position. The Bank also accepts guarantee given by State / Central Government as a security comfort. Such Guarantees remain continually effective until the facility covered is fully repaid or settled or released.

Credit Risk Mitigation recognized by the Bank for the purpose of reducing capital requirement under New Capital Adequacy Framework (Basel II Norms): The Bank has recognized Cash, Bank's own Deposits, Gold & Gold Jewellery as Credit Risk Mitigations for the purpose of reducing capital requirement under the New Capital Adequacy Framework (Basel II Norms).

Information about risk concentration within the mitigation taken: The Bank has already initiated steps for putting in place a data warehouse for a robust Management Information System (MIS) to facilitate management of Credit Risk and evaluation of effectiveness of collateral management including risk concentrations of collaterals.

TABLE DF – 6: SECURITIZATION EXPOSURES: DISCLOSURE FOR STANDARDIZED APPROACH

(i) Qualitative Disclosures:

The general qualitative disclosure requirement with respect to Buy-out of the Portfolio by direct assignment of Cash Flow:

The policy guidelines cover guidelines involving transfer of assets through Securitisation and direct assignment of cash flows and are on without recourse basis.

The guidelines to banks on securitisation of standard assets contain:

- The provisions relating to securitization of assets.
- Stipulations regarding transfer of standard assets through direct assignment of cash flows.

The bank's existing policy guidelines deals with purchase of pools from an originator (Bank/NBFC/FI). Purchase of assets through Direct Assignment of cash flows from originating NBFCs/Banks/FIs shall be only from those rated '**AA**' and above. The Bank shall purchase a portfolio or a part of portfolio of standard assets under Housing Loan; Loans Against Property and MSME sanctioned at floating rates only.

Policy sets out requirements to be met by the bank like restrictions on purchase of loans; constitution of eligible borrowers in the pool; standards for due diligence - KYC compliance, requirements to be complied with prior to disbursement in respect of borrowers in the purchased pool of assets; due diligence of the originator, Stress testing; credit monitoring.

Bank can purchase loans from other banks/FIs/NBFCs in India only if the seller has explicitly disclosed to the bank that it will adhere to the Minimum Retention Requirement on an ongoing basis and disclosed the adherence to the Minimum holding period criteria as prescribed in the policy.

The bank monitors the purchase transactions on an ongoing basis at certain intervals and takes appropriate action wherever required. The general prescription laid down in the Master policy on Credit Risk Management with regard to loan review mechanism and monitoring is applicable to securitization transactions.

The exposure to the originator shall be within the prudential exposure ceilings stipulated by the Bank.

TABLE DF – 7: MARKET RISK IN TRADING BOOK

(i) Qualitative Disclosures:

Strategies and processes: The overall objective of market risk management is to create shareholder value by improving the Bank's competitive advantage and reducing loss from all types of market risk loss events.

- While overall leadership and control of the risk management framework is provided by Risk Management Wing, the business units are empowered to set strategy for taking risks and manage the risks.
- All issues or limit violations of a pre-determined severity (materiality, frequency, nature) are escalated to the Risk Management Wing where the actions to address them are determined by the appropriate authorities. The business units are responsible for implementing the decision taken.

The process aims to:

- Establish a pro-active market risk management culture to cover market risk activities.
- Comply with all relevant legislation and regulatory requirements relating to Market Risk
- Develop consistent qualities in evolving policies & procedures relating to identification, measurement, and management, monitoring, controlling and reviewing of Market Risk.
- Establish limit structure and triggers for various kinds of market risk factors
- Establish efficient monitoring mechanism by setting up a strong reporting system.
- Adopt independent and regular evaluation of the market risk measures.

The structure and organization of the relevant risk management function: Market Risk Management structure of the Bank is as under–

- Board of Directors
- Risk Management Committee of the Board
- Asset Liability Management Committee (ALCO)
- Market Risk Management Committee (MRMC)
- General Manager – RM Wing (Chief Risk officer)-Head Office
- Market Risk Management Department, Risk Management Wing, HO
 - Integrated Mid Office
 - Mid Office – Integrated Treasury
 - Asset Liability Management Section

The scope and nature of risk reporting and/or measurement systems:

- The Bank has put in place various exposure limits for market risk management such as Overnight limit, Intraday limit, Aggregate Gap limit, Stop Loss limit, VaR limit, Broker Turnover limit, Capital Market Exposure limit, Product-wise Exposure limit, Issuer-wise Exposure limit, etc.

- A risk reporting system is in place for monitoring the risk limits across different levels of the Bank from trading desk to the Board level.
- The rates used for marking to market for risk management or accounting purposes are independently verified.
- The reports are used to monitor performance and risk, manage business activities in accordance with the Bank's strategy.
- The reporting system ensures timelines, reasonable accuracy with automation, highlight portfolio risk concentrations, and include written commentary.
- The detailed risk reports enhance the decision-making process.
- Dealing room activities are centralized, and system is in place to monitor the various risk limits.
- The reporting formats & the frequency are periodically reviewed to ensure that they suffice for risk monitoring, measuring and mitigation requirements of the Bank.

Policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigants:

Various Board approved policies viz., Market Risk Management Policy (Including Country Risk Management and Counterparty Bank Risk Management), Investment Policy, Forex dealing and trading operations Policy and ALM Policy are put in place for market risk management. Market Risk Management Policy provides the framework for risk assessment, identification, measurement and mitigation, risk limits & triggers, risk monitoring and reporting.

The Bank has developed an internal model for country risk rating based on various parameters like GDP growth, inflation, trade balance etc for risk categorization of the countries to allocate limit for taking exposure to various countries.

The Bank has in place a scoring model for categorization of foreign banks. The various exposure limits are set based on the points secured by the counterparties as per the scoring matrix.

TABLE DF – 8: OPERATIONAL RISK

(i) Qualitative Disclosures:

Strategies and processes: The Operational Risk Management process of the Bank is driven by a strong organizational culture and sound operating procedures, involving corporate values, attitudes, competencies, internal control culture, effective internal reporting and contingency planning. Policies are put in place for effective management of Operational Risk in the Bank.

The structure and organization of the relevant risk management function: The Operational Risk Management Structure in the Bank is as under:

- Board of Directors
- Risk Management Committee of the Board (RMCB)
- Operational Risk Management Committee (ORMC)
- Head / General Manager – Risk Management / Chief Risk Officer
- Operational Risk Management Department (ORMD), HO
- Chief General Managers / General Managers of Wings / Circle Heads
- Nominated Executives at Circles
- Risk Management Sections at Circles.

The scope and nature of risk reporting and/or measurement systems: The Risk reporting consists of operational risk loss incidents/events occurred in branches/offices relating to people, process, technology and external events. The data collected from different sources are used for preparation of Risk Matrix consisting of 7 loss event types and 8 business lines recognized by the RBI.

Policies for hedging and/or mitigating risk and strategies and processes for monitoring the continuing effectiveness of hedges/mitigants: Bank has put in place policies for management of Operational Risk management. The policy framework contains various aspects of Operational risk management such as identification, management, monitoring & mitigation of Operational risk areas.

In order to address risks involved in Outsourcing of activities, bank has put in place policies for management of Outsourcing Risk.

Operational Risk capital assessment: The Bank has adopted Basic Indicator Approach for calculating capital charge for Operational Risk.

Bank intends to migrate to the Advanced Measurement Approach (“AMA”).

(ii) Quantitative Disclosures:

The capital requirement for Operational Risk under Basic Indicator Approach is ₹ 20840.94 Million.

TABLE DF – 9: INTEREST RATE RISK IN THE BANKING BOOK (IRRBB)

(i) Qualitative Disclosures:

Interest Rate Risk in Banking Book (IRRBB)

Interest rate risk is the risk where changes in market interest rates affect a bank's financial position. As the bank holds rate sensitive on and off balance-sheets items of different maturity/repricing, currencies, markets and benchmark rates, and any adverse movement in these parameters exposes bank to interest rate risk. Interest Rate Risk in Banking Book (IRRBB) reveals the impact on bank's earnings (short-term impact) and net-worth (long-term impact) due to adverse movement of interest rates and is measured on a monthly basis.

Key Assumptions

The Bank strives to match the price of its assets and liabilities coupled with proper maturity matching in-order to reduce the gap in different time buckets which are maturing or getting re-priced. For measurement and management of interest rate risk, Bank adopts both the Traditional Gap Analysis (TGA) and the Duration Gap Analysis (DGA) to its global position of assets, liabilities and off-balance sheet items, which are rate sensitive.

The Bank compute its interest rate risk position in each currency applying the TGA and DGA to the rate sensitive assets/ liabilities/ off balance sheet items in that currency, where either the assets, or liabilities are 5 per cent or more of the total of either the Bank's global assets or global liabilities on a monthly basis. The interest rate risk position in all other residual currencies is computed separately on an aggregate basis. The non-maturing deposits are classified as per the behavioral study of the Bank.

The interest rate risk arises on account of re-pricing, yield curve change, basis risk and options risk. The Bank aims at capturing these risks arising from the maturity and re-pricing mismatches both from earnings perspective and economic value perspective using techniques viz.,

1. *Gap Analysis*: The basic tool for measuring interest rate risk is preparation of Interest Rate Sensitivity Statement (IRS) by grouping various items of Rate Sensitive Assets (RSA) and Rate Sensitive Liabilities (RSL) and off balance-sheet items into different time buckets according to the residual maturity or next re-pricing, whichever is earlier and arriving at the net gap (i.e., RSA - RSL). A positive or asset sensitive Gap means that an increase in market interest rates result in an increase in NII. Conversely, a negative or liability sensitive Gap implies that the Bank's NII could decline as a result of increase in market interest rates.
2. *Earnings at Risk (EaR)*: Earnings at Risk (EaR) indicate the impact of repricing risk on the earnings due to the parallel shift in interest rate assessed for different rate shocks. Impact on the earnings is also estimated for yield curve change and basis risk.

3. *Market Value of Equity (MVE)*: A long-term impact of changing interest rates is on bank's Market Value of Equity (MVE) or Net-worth as the economic value of bank's assets, liabilities and off-balance sheet positions get affected due to variation in market interest rates. The estimated drop in the Market Value of Equity (MVE) as a result of prescribed rate shock arising from changes in the value of interest rate sensitive positions across the whole Bank is estimated by the Duration Gap Analysis (DGA).

TABLE DF – 10: GENERAL DISCLOSURE FOR EXPOSURES RELATED TO COUNTERPARTY CREDIT RISK

(i) Qualitative Disclosures:

Bank has a board approved policy on Counterparty Credit Risk Management. This policy sets out the standards and guidelines for Counterparty Credit Risk Management at the Bank. Through this policy the bank shall establish its standards and guidelines for identification of CCR in market traded instruments covering various components and relevant sources of risks. This addresses Pre-settlement Risk, Settlement Risk and Wrong Way Risk.

Counterparty Credit Risk is a multi-dimensional form of risk, affected by both the exposure to counterparty and the credit quality of the counterparty, both of which are sensitive to market-induced changes. It is also affected by the interaction of these risks, for example the correlation between an exposure and the credit spread of the counterparty, or the correlation of exposures among the counterparties of the Bank. Implementing an effective CCR management framework thus requires a combination of risk management techniques from the credit, market, and operational risk disciplines.

Bank's limit setting and monitoring is primarily covered across existing policies such as Loan Policy, Credit Risk Management Policy, Investment Policy, Master Policy for Market Risk, Policy on Exposure Limits on Counterparty Banks and Policy on Off- Balance Sheet Exposure.

Bank includes under consideration the following for setting the limits, their review and monitoring for counterparty credit risk:

- Bank shall establish and enforce operating limits and other internal control practices that maintain their CCR exposures within levels consistent with the established risk tolerance, policies and strategies for CCR management.
- CCR limits may be set on the amounts and types of transactions authorized for each counterparty, with distinct limits for pre-settlement risk and settlement risk, for individual counterparties and each group of related counterparties. Such limits should take into account the results of stress-testing.
- Sub-limits may also be established for specific products (e.g. forwards, options, swaps or SFTs), market or industry sectors (e.g. financial institutions or corporates), or underlying market factors (e.g. exchange rates and interest rates) wherever deemed necessary.
- Bank shall set limits for pre-settlement risk based on the creditworthiness of the counterparty in the same way as for traditional credit exposures.
- For settlement risk limits, over and above the creditworthiness of the borrower, the bank shall also consider other parameters like notional amount of the payment obligations involved, the efficiency and reliability of the relevant settlement systems employed (e.g. the use of payment-versus-payment and delivery-versus-payment systems will help eliminate settlement risk), the period for which the exposure will remain outstanding, and any associated collateral or netting arrangements.

- The limits shall be subject to annual reviews and placed to appropriate reviewing authority.
